

Cut panels accurately.

After cutting main panels  
ie 2 aft hull sides, aft bottom)  
to avoid mistakes mark out  
the other panels and Bhds  
but do not cut any until  
all have are marked

Foredeck, aft buoyancy  
and seat tops are  
cut out after hull assembly

All panels for the rowing  
version can be cut  
from 2 sheets of 8ft x 4ft  
4mm (3/16in) plywood  
The sailing version needs  
another sheet to make wings  
rudder and daggerboard

Hatched areas are butt straps
